RMS-60

Filtration Monitoring System

The **RMS-60** integrates seamlessly with existing building management systems for onsite and remote monitoring of dual and primary filtration systems.

Remote Filtration Monitoring Systems prevent unexpected equipment downtime caused by sudden filter clogging. The color coded panel lights on the controller give an instant status report on system power and on alarms for high vacuum and high water level in both filter separator bowls.

The RMS controller is designed for use in applications where **downtime is unacceptable & redundant filtration a necessity**. The RMS will timely warn the operator to switch filters and keep heavy equipment and generators running at all times.

- Remote Filter Monitoring
- Dual Watect 550 Water Sensors
- BMS/BAS Interface (Dry Relay Contacts)
- Easy Access Alarm Reset

	Power (Green)	24V DC
	High Vacuum (Red)	
	High Water Left Filter (Red)	
	High Water Right Filter (Red)	
	Alarm Reset (Blue)	
Weight		8 Lbs / 4 Kg
Dimensions		10 x 8 x 6 in 25 x 20 x 15 cm
